- A brief text description of the deliverable including objective of the iteration core user stories

- Brief explanatory text of the user goals/tasks implemented and the flow/navigation supported by e.g. flow/navigation diagram from Adobe XD

- A link to the interactive prototype and possibly the Adobe XD or Justinmind mobile app, allowing the prototype to be downloaded on a mobile. Permissions and instructions in order to use prototype should be provided.

- Clarifying questions for the project provider relating to any uncertainties, if necessary.

- If time allows, a higher fidelity prototype can also be delivered to discuss initial design ideas and concepts.
